Five Essential Tools
to Achieve Surgical Convenience

Assist Kit

1. Tissue Punch

2. Bone Profiler **4.** Crest Remover

**3.** Trephine Drill **5.** Autobone Collector

HIOSSEN
IMPLANT

❶ Tissue Punch

Minimizes incisions and reduces healing time

- The guide pin configuration enables precise tissue removal at the designated location
- Recommend using a diameter 0.7-1.5mm smaller than the healing abutment diameter

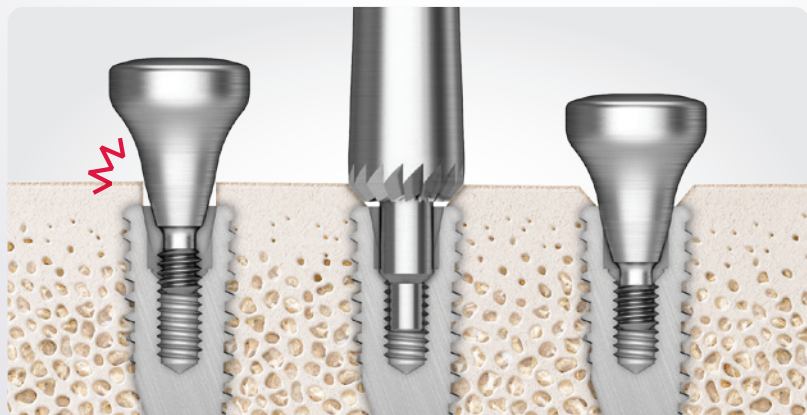

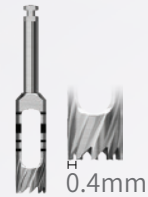

❷ Bone Profiler

Removes protruding bone without internal damage of the implant

- Easily removes adjacent obstructive bone around the implant
- Detachable guide protects interior of the implant while removing the bones

❸ Trephine Drill

Thin blade wall (0.4mm) minimizes amount of the bone removed

- The drill is designed to harvest larger block bone from the donor site or to remove the failed implant
- The 0.4mm thin wall design reduces the quantity of removed bone

❹ Crest Remover

Net-shaped blades of the bur speeds up ridge widening

- The blade is designed to minimize bone splattering effectively during the drilling process

❺ Autobone Collector

Collects bone chips through drilling

- Efficiently gather autogenous bone chips with a strong cutting force and design
- The stopper enables a safer method for collecting bone material (0.18g acquired at one operation)
