Al-powered Smart 3D Viewer

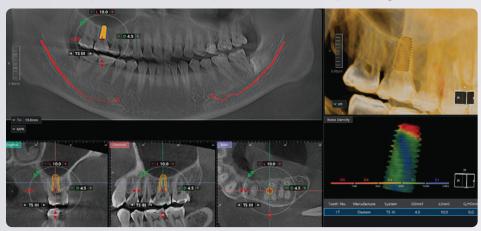

Convenient and precise diagnoses are now just a click away, as the new AI feature automatically traces the dental arch and inferior alveolar nerves

◀ Al empowered dental arch creation and auto nerve tracing

Optimized Implant Simulation: Intuitive 3D Viewer

Enhanced implant simulation to provide user-friendly 3D diagnosis

■ One3 Software - Implant placement simulation

Panoramic

Cephalometric

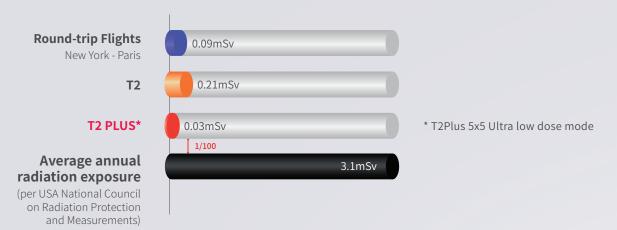

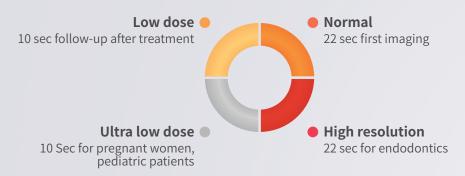

Ultra-low Radiation Dosage

100 times lower radiation dose than natural exposure

4 Imaging Options

Depending on the diagnostic intent, you can choose the optimal acquisition time and radiation dose

Multiple FOV: 5x5, 8x9, 10x9, 12x9, 15x9, 15x15

Imaging size and location can be selected to suit your diagnostic needs

5x5 Right Molar

8x9 Left

10x9 Left Right

12x9 Full Arch

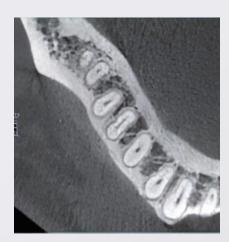

15x9 Sinus

15x15 Facial

0.05mm Voxel Size

T2 PLUS FOV 5X5 **0.05mm**
