

Normal Bone
**Just in
Two Steps!**

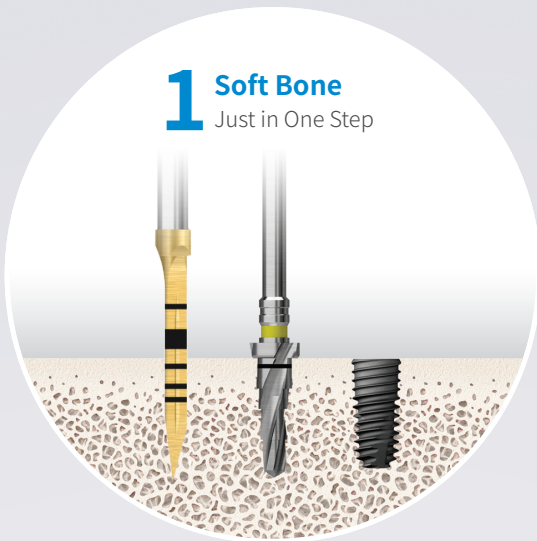

Convenient procedure in only 2 Steps

122 Taper Kit

- Optimized surgical kit for Hiossen's ETIII & ETIV implant system
- Reduce chair time with just 2 drilling procedures
- Increase user convenience by eliminating the cortical drilling step

Use for **EKIII/ETIII/ETIV**

HIOSSSEN
IMPLANT

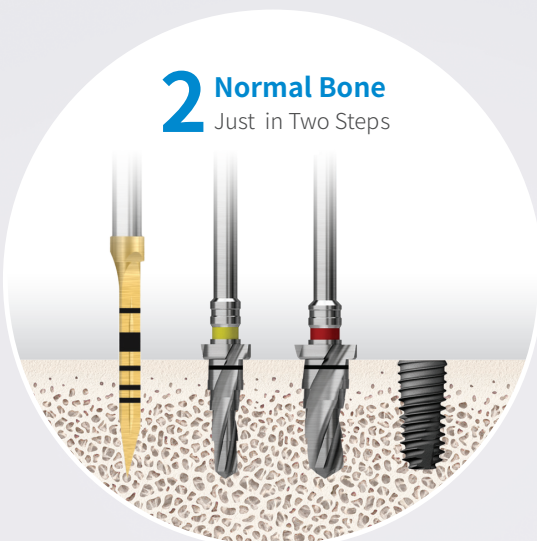

1 Soft Bone

Just in One Step

Excellent Drilling Power

Maximized cutting power with a distinguished drill design and innovative manufacturing technology that skips intermediate drilling and provides a smooth and fast drilling result.

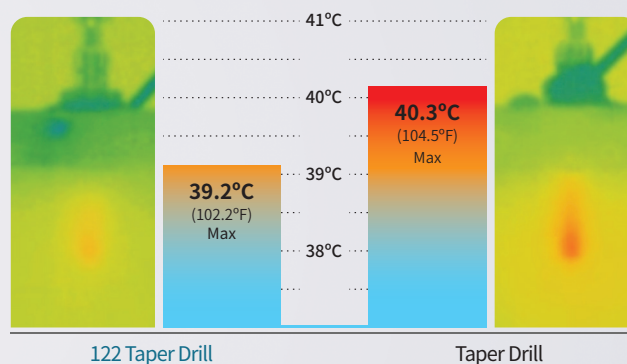

2 Normal Bone

Just in Two Steps

Preventing Bone Heating

Excellent cutting power leads to skipping cortical drilling which prevents bone heating by maintaining low drilling temperature

122 Taper Drill

Taper Drill

Drill temperature comparison between the 122 taper drills and other taper drills

2 Hard Bone

Just in Two Steps

Preventing Drill Bouncing

Multi-level tapered drill also functions as a pilot drill and prevents bouncing during drilling
